Fraction

A mixed number has a \_\_\_\_\_ number and a \_\_\_\_\_.

Improper fractions represent more than \_\_\_\_ whole.

If the numerator and denominator are the \_\_\_\_\_, then the fraction represents ONE whole.

2 ways to convert improper fractions to mixed numbers:

- 1) draw a \_\_\_\_\_.
- 2) \_\_\_\_\_.

The remainder becomes a \_\_\_\_\_.

THINK: Convert to mixed fractions.

$$\frac{5}{4}$$

$$\frac{7}{3}$$
